SANCTUARY, INC.,

Respondents.

STATE OF NEW YORK)
) ss:
COUNTY OF NY)

Jane Goodall being duly sworn, deposes and says:

Introduction and Qualifications

1. My name is Jane Goodall. I am the founding director and president of the Jane Goodall Institute, UN Messenger of Peace, primatologist, ethologist, and anthropologist. I received a Ph.D in Ethology from Cambridge University in 1966 and have been awarded honorary degrees from 45 Universities from nearly every continent, including institutes of higher learning in Africa, Asia, Europe, North America, and South America.

2. I submit this Affidavit in support of Petitioner, The Nonhuman Rights Project, Inc.'s ("NhRP"), petition for a writ of habeas corpus brought on behalf of Kiko. I am a non-party to this proceeding.

3. In 1977, I founded the Jane Goodall Institute, which is considered a global leader in the effort to protect chimpanzees and their habitats. The Institute is widely recognized for innovative, community-centered conservation and development programs in Africa, and the "Jane Goodall's Roots & Shoots" program is a global environmental and humanitarian youth program comprised of nearly 150,000 members in more than 120 countries. Although the majority of my career was spent completing field research on chimpanzees in Tanzania, I have been appointed the following academic positions (in reverse chronological order): (1) Visiting Professor, Department of Psychiatry and Program of Human Biology, Stanford University; (2) Honorary Visiting Professor in Zoology, University of Dar es Salaam, Tanzania; (3) Adjunct Professor of the Department of Environmental Studies, Tufts University, School of Veterinary Medicine; (4) Distinguished Adjunct Professor, Departments of Anthropology and Occupational Therapy, University of Southern California; and (5) Andrew D. White Professor-at-Large, Cornell University.

4. During my career I have received over 100 awards from a variety of wildlife conservation, academic, media, government, and nongovernment organizations. Most notably, I received the Kyoto Prize in Basic Science in 1990, the United Nations "Messenger of Peace Appointment," was named a Dame of the British Empire in 2002, awarded the French Legion of Honor in 2006, the United Nations Educational, Scientific and Cultural Organization's Gold Medal Award in 2006, and the United States Department of the Interior, Secretary's Lifetime Achievement Award in 2009. Other awards that I have received include: (1) the Centennial

Award from the National Geographic Society in 1988; (2) the Anthropologist of the Year Award in 1989; (3) the Edinburgh Medal, UK in 1991; (4) the Rainforest Alliance Lifetime Achievement Award in 1993; (5) the Commander of the British Empire, presented by Her Majesty Queen Elizabeth II in 1995; the National Science Board Public Service Award in 1998; (6) the International Peace Award in 1999; (7) the Harvard Medical School's Center for Health and the Global Environment award in 2003; (8) the Nierenberg Prize for Science in the Public Interest in 2004.

5. I have been affiliated with 90 wildlife, conservation, humanitarian, professional and governmental organizations. The most relevant include: (1) Member of the Board of the Orangutan Foundation since 1994; (2) President of Advocates for Animals from 1998 to May 2008; (3) Member of the Board, Save the Chimps / Center for Captive Chimpanzee Care from 2000 to 2007; (4) Member of the Honorary Board, Albert Schweitzer Institute since 2003; (5) Member of the Advisory Board, Initiative for Animals and Ethics, Harvard University since 2004; (6) Member of the Advisory Board, Chimps Inc., from 2005; (7) Honorary Board, Center for Great Apes since 2012; and (8) Member of the Board of Directors of the Nonhuman Rights Project, Inc. since 1996.

6. My research specialization is in the study of the behaviour and ecology of chimpanzees and baboons. Since 1960, I have conducted field research on chimpanzees and baboons beginning with my research on the behaviour of free-living chimpanzees in Gombe National Park, Tanzania. From 1967 to 2003 I served as the Scientific Director of the Gombe Stream Research Center in Tanzania. From 1972 to 2003, I also served as the Director of Research on the behaviour of the olive baboon at the Gombe National Park, Tanzania.

7. I have written or co-authored more than 30 books, including: (1) *My Friends the Wild Chimpanzees* (1967, National Geographic Society); (2) *In the Shadow of Man* (1971, Boston: Houghton Mifflin; London: Collins); (3) *The Chimpanzees of Gombe: Patterns of Behaviour* (1986, Harvard University Press); (4) *Through a Window: My Thirty Years with the Chimpanzees of Gombe* (1990, London: Weidenfeld & Nicolson; Boston: Houghton Mifflin); (5) *Visions of Caliban* (1993, Boston: Houghton Mifflin); (6) *Brutal Kinship* (1999, New York: Aperture Foundation); (7); *Reason For Hope: A Spiritual Journey* (1999, Warner Books, Inc); (8) *The Ten Trusts: What We Must Do To Care for the Animals We Love* (2002, San Francisco: Harper San Francisco); (9) *Harvest for Hope: A Guide to Mindful Eating* (with Gary McAvoy and Gail Hudson)(New York: Warner Books); (10) *2005 50 Years at Gombe* (2010, New York: Stewart, Tabori, and Chang); (11) *Hope for Animals and Their World: How Endangered Species Are Being Rescued from the Brink* (with Thane Maynard and Gail Hudson)(2009, New York: Grand Central Publishing); (12) *Seeds of Hope: Wisdom and Wonder from the World of Plants* (with Gail Hudson)(2014, New York: Grand Central Publishing). Additionally, *In the Shadow of Man* was translated into 48 different languages, while *Through a Window: My Thirty Years with the Chimpanzees of Gombe*, and *Reason for Hope: A Spiritual Journey* were translated into 15 and 13 languages respectively. *Visions of Caliban* was honoured by the New York Times as a “Notable Book” for 1993, as well as Library Journal, which awarded it “Best Sci-Tech Book” for 1993.

8. Since 1963, I have been featured in approximately 20 science-related films, produced by networks including the National Geographic, HBO, BBC, PBS, Animal Planet / Discovery Communications. HBO’s film “Chimps, So Like Us” was nominated for the 1990 Academy Award.

9. I have published more than 80 articles, including peer-reviewed articles in the world's most-cited scientific journals: *Nature*, *Science*, *The American Journal of Psychiatry*, *The American Journal of Physical Anthropology*, *The American Journal of Primatology*, *The International Journal of Primatology*, *Conservation Biology*, *The New York Academy of Science*, *Philosophical Transactions of the Royal Society*, *Folia Primatologica* (the official journal of the European Federation for Primatology), *Journal of Medical Primatology*, *Journal of Human Evolution*, *Primates*, *Journal of Virology*, *Zoological Society of London*, and *the Society for Reproduction and Fertility*. My articles have also been featured in *National Geographic* and *Science News*. These publications covered topics on the behaviour, ecology, welfare, and conservation of chimpanzees, baboons and other monkeys. Specific topics of these publications include: tool-use, diet, feeding behaviour, expressive movements, communication, play, reproductive behaviour, reproductive constraints on aggressive competition, mother-child bonds, culture, aggressive behaviour, predation, community behaviour, mortality, ranging patterns, continuities between chimpanzee and human behaviour, ecological factors, sleeping behaviour, cannibalism, competitive behaviour, inter-community interactions with humans, population dynamics, infanticide, innovative behaviour, shunning, skeletal biology, gene flow and evolution of chimpanzees, social structure, psychosocial needs, simian immunodeficiency virus, unusual violence, anogenital swelling in pregnant chimpanzees, appropriate conditions for maintenance of chimpanzees.

10. I regularly give lectures and take part in international symposia on primatology. I currently spend more than 300 days out of the year travelling around the world speaking on primate issues.

11. My Curriculum Vitae sets forth my educational background and experience and is annexed hereto.

Basis for Opinions

12. The opinions I state in this Affidavit are based on my professional knowledge, education, training, and over 50 years of observing and writing about chimpanzees, including my 45-year study of social and family interactions in the wild chimpanzees of Gombe Stream National Park, Tanzania and my continuing work on chimpanzee behaviour, welfare and conservation through the Jane Goodall Institute.

Opinions

13. The long-term nature of the research I conducted on wild chimpanzees in Gombe Stream National Park provided a unique opportunity to observe and study the lives of chimpanzees in nature over many years and generations. During this period of continuous study my colleagues and I have learned much of enormous significance about chimpanzee psychology and society.

14. There is ample proof from studies of chimpanzee behavior, both in the wild and in captivity, that chimpanzees have well-defined duties and responsibilities. Following are some examples.

15. The duties and responsibilities of a mother towards her offspring are many and often onerous. For three years the infant is dependent on breast milk, and continues to suckle though less often for the next two years until the next baby is born. Throughout this period the mother continues to carry the infant, at first clinging to her belly and then riding on her back. During this time the mother waits for the child before moving off. And she constructs a nest large enough for herself and her child until the next baby is born.

16. The mother's duties and responsibilities do not end when a new infant is born. For the next couple of years she still waits for the older child before moving from one place to another. When the older child is male, he is often anxious to join groups of adult males, particularly when there is a lot of excitement. Mothers with small infants often prefer to avoid such groups. Sometimes a mother, after setting off in her chosen direction, stops when her six-year-old son whimpers and refuses to follow, going some distance towards the males. Each time she moves, he cries louder. Some mothers then give in, and join the males in order to provide support for their sons.

17. An important component of maternal responsibility is to provide support for her child. During a play session her infant sometimes gets hurt and screams – the mother will hasten to support her child, reprimanding the rough playmate even though this may entail retaliation from a more dominant mother.

18. There have been many instances when mothers have gone to help their fully-grown offspring.

19. In the wild the father plays no role in family life. We can now determine paternity from DNA profiling of fecal samples, but as a female may be mated by most or all males during periods of receptivity, it seems unlikely that a male recognizes his own biological offspring. However, most adult males of a community act in a paternal way to all infants in their community, rushing to their aid when necessary. On one occasion two hunters (human) shot a female chimpanzee, seized her infant, and tried to push it into a sack. As the infant screamed, a male chimpanzee rushed out of the forest, attacked the two men, grabbed the baby, and disappeared into the forest. Both hunters ended up in hospital. There are many other tales of

adult males protecting – or trying to protect – infants from hunters across Africa. Tragically they often get killed themselves.

20. Juveniles and adolescents very frequently act responsibly towards their infant siblings. (When I refer to ‘brother’ and ‘sister’ I mean maternal brother and sister.) One nine-year-old female, who had run in terror from a large poisonous snake, nevertheless climbed down from her tree to gather up and carry to safety her three-year-old brother, who seemed unaware of the danger. A different adolescent female prevented her infant brother from following their mother when the trail passed through a clump of tall grasses. He screamed loudly, but she persisted until the grasses were behind them – I examined the place – it was infested with tiny ticks. (Subsequently the mother sat picking ticks off herself for a long time.)

21. An older sibling will almost always adopt an infant if their mother dies. Under the age of three the infant, dependent on breast milk, will die. One five-year-old male carried his one and a half year old sister around until she died, a few months later. Older infants usually survive when they are adopted. This responsibility is clearly not socially advantageous for the young caregiver, who spends a lot of time and energy carrying out his or her duties.

22. We now know that unrelated individuals may adopt orphaned infants. At Gombe a 12-year-old adolescent male cared for a three and a half year old male orphan, and definitely saved his life. His sense of responsibility was most impressive when he ran to seize the orphan when he got too close to socially roused males – despite the fact that adolescent males normally keep well away from the adult males at such times. He often got beaten up for his altruistic behavior, but this did not prevent him from acting in the same way the next time his help was needed.

23. The adult males of a community are responsible for patrolling their territory, chasing away or attacking individuals from neighboring communities – this serves to protect and sometimes increase resources for their own females and young. This requires close cooperation and gang attacks. Even two males who may be engaged in challenging each other for social dominance within the community will join in an attack on a stranger.

24. None of the many field staff, students and other researchers who have worked among the Gombe chimps for 55 years have ever been really harmed. We have been hit, stamped on and dragged during displays, but never received bite wounds. One male in particular, Frodo, was continually charging people and hitting them, and he sometimes pushed me over. It is clear, however, that the chimpanzees only intend to impress, to emphasize their superiority. They could so easily harm us badly, even kill us. On three separate occasions, when I was above a very steep drop, Frodo charged up but did not make contact. Our videographer, Bill Wallauer, reported four such occasions. It was very clear to us that Frodo understood what would have happened on those seven occasions. The same thing happened to me once with a different alpha male. They are clear examples of intention *not* to harm.

25. I have written about a male chimpanzee in captivity who rescued his human caretaker, Mark Cusano, with whom he had a close relationship, from a very bad attack from three adult females. Mark told me that the chimp had saved his life.

26. Based upon my research and expertise in this field, I support the NhRP's petition for a writ of habeas corpus on behalf of Kiko and the application of common law personhood to chimpanzees.
